## AK-UBX100

Panasonic is Creating the Future of Video Production with More Flexibility. More Precision. And More True to You. The AK-UBX100 box-style 4K multi-purpose camera utilizes the same main functional and original core design and shared menu interface as the AK-UCX100 4K studio camera. This eliminates the complexity of color matching, which has been a longstanding issue, and unifies operability across devices. Also, by utilizing a common remote operation panel (ROP), seamless integration with the AK-UCX100 4K studio camera and the AW-UE160 4K PTZ camera becomes possible, leading to significant improvements in operational efficiency on the shooting site. The AK-UBX100 independently supports a variety of IP protocols including SMPTE ST 2110, NDI®, SRT and its interfaces include two 12G-SDI ports and two SFP28 ports. In addition to basic moiré reduction performance designed for various production needs, the addition of

### Key Features
