Footnote Description	 This is the value when the Zoom Lens (Model No.: ET-D3LES20) is used with pow supply voltage of AC 200 V to AC 240 V. The value varies depending on the lens When [OPERATING MODE] is set to [NORMAL]. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. Value is the average of all product when shipped. Measurement, measuring conditions, and method of notation all comply with American National Standards Institute standards. Value is the average of all products when shipped. Average light-output value of all shipped products measured at the center of th screen. Average light-output value of all shipped products measured at the center of th screen. Around this time, light output will have decreased by approximately 50 %. IEC62087: 2008 Broadcast contents, NORMAL Mode, Dynamic Contrast [3], und conditions with 35 °C (95 °F),700 m (2,297 ft) above sea level, and 0.15 mg/m3 o particulate matter. Estimated time until light output decreases to 50 % will vary depending on environment. 4K signals are converted to WUXGA (1920 x 1200 pixels) only for the PT-RZ24K and PT-RZ17K. Maximum value of light output is further decreased in the following cases: when a function board is installed in the slot, when the light source is deteriorating from use, or when there is dust on the optical parts. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. On-mode power consumption measured at 25 °C (77 °F) operating temperature at an altitude of 700 m (2,297 ft) 0. Average value. May differ depending on the actual unit. When optional AJ-WMS0 Series wireless module is attached, operating temperature range becomes 0–40 °C (32–104 °F). The operating environment temperature should be between 0 °C (32 °F) and 40 °C (104 °F) if the projector is
