and PT-RZ17K.

conditions with 35  $^{\circ}$ C (95  $^{\circ}$ F),700 m (2,297 ft) above sea level, and 0.15 mg/m3 of particulate matter. Estimated time until light output decreases to 50 % will vary

7. 4K signals are converted to WUXGA (1920 x 1200 pixels) only for the PT-RZ24K

8. Maximum value of light output is further decreased in the following cases: when a function board is installed in the slot, when the light source is deteriorating

9. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. On-mode power consumption measured at 25 °C (77 °F) operating temperature at an altitude of 700 m (2,297 ft).

11. When optional AJ-WM50 Series wireless module is attached, operating temperature range becomes 0–40 °C (32–104 °F). The operating environment temperature should be between 0 °C (32 °F) and 40 °C (104 °F) if the projector is used at an altitude between 1,400 m (4,593 ft) and 4,200 m (13,780 ft).
