| Footnote Description | When [PICTURE MODE] is set to [DYNAMIC] and [LIGHT POWER] is set to [NORMAL]. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. Value is the average of all products when shipped. Measurement, measuring conditions, and method of notation all comply with American National Standards Institute standards. Value is the average of all products when shipped. Around this time, light output will have decreased to approximately 50 % of its original level ([PICTURE MODE]: [DYNAMIC], [DYNAMIC CONTRAST] set to [2]). Estimated time until light output declines to 50 % varies depending on environment. 4K signals are converted to the projector's resolution (1920 x 1200 pixels) upon projection. YP_BP_R 4:2:0 format only for 4K/60p and 4K/50p signals input via DIGITAL LINK. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards.
