Footnote Description	 When [PICTURE MODE] is set to [DYNAMIC], [LIGHT POWER] is set to [NORMAL], and [SYSTEM DAYLIGHT VIEW] is set to [OFF]. Measurement, measuring conditions, and method of notation all comply with
	ISO/IEC 21118: 2020 international standards. Value is average of all products when shipped. 3. Measurement, measuring conditions, and method of notation all comply with American National Standards Institute standards. Value is the average of all products when shipped.
	4. Around this time, light output will have decreased to approximately 50 % of its original level ([PICTURE MODE]: [DYNAMIC], [DYNAMIC CONTRAST] set to [2], temperature 30 °C (86 °F), elevation 700 m (2,297 ft) with 0.15 mg/m3 of particulate matter). Estimated time until light output declines to 50 % varies depending on environment.
	 Resolution decreases when using Digital Zoom Extender. Some screen-correctio functions are not available when using this function, and range of corner adjustment is limited. When Digital Zoom Extender is set to 80 %.
	 Supports signals up to 4K/30p. A signal with different resolution is converted to the number of display dots (1920 x 1200 dots).
	 Depending on the connected CEC command-compatible device, the link control may not operate normally.
	 Main version of the firmware must be 2.00 or higher. Optional wireless module A WM50 does not support IPv6.
	10. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. On-mode power consumption measured at 25 °C (77 °F) operating temperature at an altitude of 700 m (2,297 ft
	11. Filter cleaning cycle varies depending on environment. Filter can be washed and reused up to two times. Filter cleaning cycle: 20,000 hours (under dust conditions of 0.08 mg/m3), 10,000 hours (under dust conditions of 0.15 mg/m3)
	12. Average value. May differ depending on the actual unit. 13. Light output is limited at operating temperatures higher than 30 °C (86 °F), and
	projectors cannot be operated at altitudes higher than 2,700 m (8,858 ft) above sea level. When optional AJ-WM50 Series wireless module is attached, operating temperature range becomes 0–40 °C (32–104 °F).
	14. When using Presenter Light Software, images are projected with 1280 x 800 dot or 1024 x 768 dots onto the screen. Also, your PC display resolution may be forcibly changed, and audio playback disrupted or become noisy, while images and sound are being transmitted.
	15. When using the Wireless Projector app, display resolution differs depending on your iOS/Android™ device and the display device. The maximum supported display resolution is WXGA (1280 x 800).
