

**El proyector más pequeño y ligero del mundo de 42.000 lm\*1 : El nuevo estándar en mapeo de proyecciones 4K**

## PT-RZ44K

Proyector láser 3-Chip DLPTM con 42.000 lúmenes de brillo y resolución 4K (3840 × 2400) mediante tecnología Quad Pixel Drive. Incorpora un motor de luz láser multifuente (dos láseres azules y un láser rojo) para una alta precisión de color y transiciones suaves. Compatible con ópticas intercambiables (óptica no incluida). Nivel de ruido de funcionamiento: aproximadamente 50 dB. Incorpora ranura Intel® SDM. entrada

### Key Features

Diseñado para un flujo de trabajo eficiente

Rendimiento fiable en aplicaciones exigentes

Visuales espectaculares a cualquier escala

| <b>Footnote Description</b>                                             | <ol style="list-style-type: none"> <li>1. Value with ET-D3LES250 Zoom Lens (available CY2026) and a power supply voltage of AC 200-240 V. The value varies depending on the lens.</li> <li>2. When [PICTURE MODE] is set to [DYNAMIC] and [LIGHT POWER] is set to [NORMAL].</li> <li>3. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards. Value is the average of all products when shipped.</li> <li>4. Measurement, measuring conditions, and method of notation all comply with American National Standards Institute standards. Value is the average of all products when shipped.</li> <li>5. Average light-output value of all shipped products measured at the center of the screen in NORMAL Mode.</li> <li>6. Around this time, light output will have decreased to approximately 50 % of its original level ([PICTURE MODE] is set to [DYNAMIC], [DYNAMIC CONTRAST] is set to [2]). Estimated time until light output declines to 50 % varies depending on environment.</li> <li>7. 4K signals are converted to WUXGA (1920 x 1200 pixels) only for the PT-RZ44K.</li> <li>8. Optional AJ-WM50 Series Wireless Module is not compatible with IPv6.</li> <li>9. Measurement, measuring conditions, and method of notation all comply with ISO/IEC 21118: 2020 international standards.</li> <li>10. On-mode power consumption measured at 25 °C (77 °F) operating temperature at an altitude of 700 m (2,297 ft).</li> <li>11. Average value. May differ depending on the actual unit.</li> <li>12. Do not install the projector at an altitude of 4,200 m (13,780 ft) or higher above sea level. (Altitude of 4,200 m [13,780 ft] above sea level is the maximum height that the performance of this projector is guaranteed.) Using the projector in a location where the altitude is too high or the ambient temperature is too high may reduce the life of the components or result in malfunctions. Upper limit of the operating environment temperature varies depending on the altitude above sea level. When using the projector at an altitude between 0 m (0 ft) and 1,400 m (4,593 ft) above sea level: 0 °C (32 °F) to 45 °C (113 °F). When using the projector at an altitude between 1,400 m (4,593 ft) and 4,200 m (13,780 ft) above sea level: 0 °C (32 °F) to 40 °C (104 °F). Do not use the projector in a location where the ambient temperature exceeds 40 °C (104 °F) regardless of the altitude when the optional AJ-WM50 Series Wireless Module is attached to the projector.</li> </ol> |
